NETEX Apparel

TEXTILE & APPAREL ERP · BUILT FOR BANGLADESH

Run your mill with complete *clarity.*

From the first buyer inquiry to export proceeds: spinning, knitting, dyeing, garments, export, compliance and payroll on one platform, so every order tells one story.

WHAT IT COVERS

Every area of a vertical group, *one database, one login.*

Merchandising
Inquiries, styles, cost sheets, buyer orders, fabric bookings

Planning
T&A, plan board, capacity, MRP, what-if

Purchase & stores
Comparative statements, BTB gate, gate entry, lots and rolls

Bonded warehouse
Licence, UD / UP, coefficients, append-only ledger

Spinning
Bales and HVI, laydowns, ring production, yarn lab

Knitting
Programs, roll doffing, 4-point greige inspection

Dyeing & finishing
Recipes, batches, ZDHC checks, shade groups, costing

Garments
Cutting, bundles, operation bulletins, needle control, SSCC packing

Quality
In-line, end-line, final AQL, NCR to CAPA, lab tests

Commercial & export
Master LC, BTB, EDF, invoices, EXP, realisation

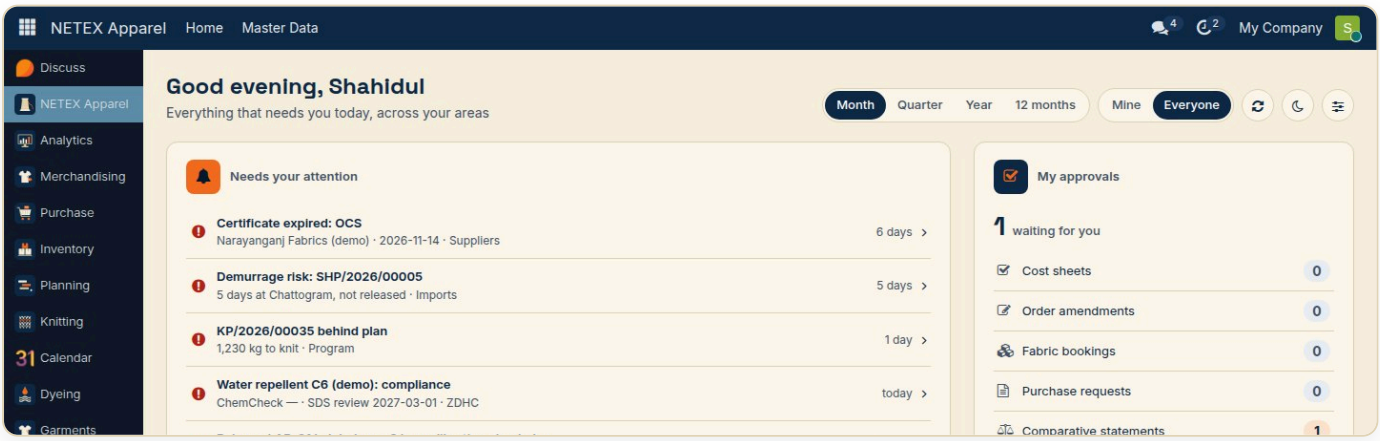
Accounting & Mushak
Export receivables, VAT forms, order profitability, cash forecast

HR & payroll
Labour Act overtime and leave, payroll, MFS wage payment

Traceability & ESG
Carton to bale genealogy, product passport, buyer packs

IoT & maintenance
Devices, OEE, breakdowns, preventive maintenance, spares

Analytics & alerts
Owner dashboard, daily flash, WhatsApp and SMS



The owner's home screen: what needs attention today and what waits for approval. Screens show fictional demonstration data (demo).

BUILT FOR BANGLADESH

The rules are already in the system, *set per company.*

Area	Built in
Export	Master LC and contracts, BTB with headroom checks, EDF, EXP and the 120-day repatriation rule, realisation with source tax and distribution
Bond	Licence and entitlement, UD / UP register with import limits, coefficients, append-only bond ledger
VAT	Mushak 4.3, 6.1, 6.2, 6.3, 6.7, 6.8 and 9.1 with the input-VAT gate
Labour	Labour Act 2006 overtime caps and leave, wage-board grades, Bangla payslips, wages to bKash, Nagad and Rocket
Buyers	ZDHC MRSL, AQL, 4-point inspection, needle policy, compliance gates before shipment

Configured, not customised: 828 settings per company, dated statutory values, English by default with Bangla per user. Bank and customs formats are file imports confirmed with the issuer at implementation.

ORDER TO CASH

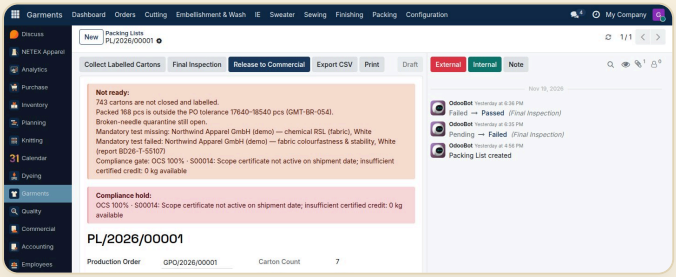
One order thread, *nothing typed twice.*

Inquiry → Cost sheet → Buyer order → Fabric booking → T&A and plan → Purchase and bond → Knitting → Dye batch → Cutting → Sewing → Final AQL → Packing → Master LC and BTB → Invoice and EXP → Realisation → Order profit

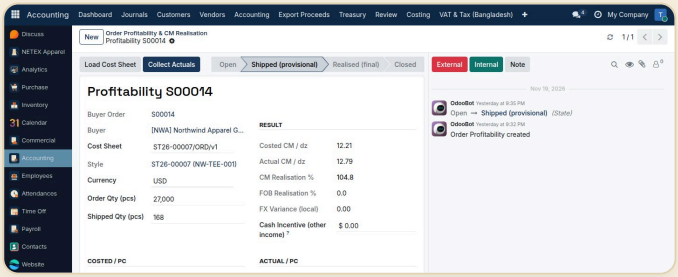
27,000 pcs
Order S00014, FOB Chattogram, ex-factory 20 Feb 2027 (demo)

USD 66,195.90
Master LC DEHH-ML-27-0042, BTB headroom checked (demo)

104.8 %
CM realisation: costed 12.21, actual 12.79 per dozen (demo)



Packing list (demo): the system says "not ready" and why.



Order profitability (demo): the real margin, per order.

HOW GO-LIVE WORKS

1 Configure
Company, units, roles and dated Bangladesh defaults set from the settings screens.

2 Load
Migration templates and opening-balance loaders for stock, open orders, receivables and payables. Audited, with rollback.

3 Rehearse
Your people walk the user guide role by role on a sandbox copy with personal data masked.

4 Cut over
Reconciliation proves the opening figures agree, then the unit goes live.

Tested by walking every screen as each of the 21 role profiles: 195 findings, 185 fixed, 10 confirmed as intended behaviour. WhatsApp, SMS and bank connectors are ready and go live with your own accounts.
